

ENGnID

BEST DESIGN COMPETENCE

Innovative Design

ENG'nD Oy offers sophisticated engineering and project management services for shipbuilding and process industry.

Our operations are focused on hull and machinery design as well as HVAC systems and interiors for public areas. Thanks for more than 30 years of experience in various engineering projects and continuous operational development, we are trusted partner for even large and demanding projects.

We have approximately 60 professionals working in different engineering tasks. The personnel's high competence and continuous re-qualifying as well as carefully selected professional network guarantee that the execution of each project is high-quality, cost-efficient and on schedule. We do not content ourselves with ordinary solutions; instead, we want to constantly develop new, innovative solutions that promote the efficiency of our Customers' products and processes.

We use state-of-the-art technology and software. This ensures that work proceeds smoothly and 3D models and plans are precise and reliable.

International operator

ENG'nD is a subsidiary of Meyer Turku Ltd. The operating models and support of the large and stable parent company create a solid foundation for our operations today and tomorrow. Like Meyer, we are known for extremely high-quality and right-on-time services and customized solutions tailored according to the customer's needs.

The extensive training selection of Meyer Turku Shipbuilding School is also available for us. Our personnel regularly participates in shipbuilding technology and software training organized by the Shipbuilding School.

Our international operating environment offers versatile development opportunities both for the company and for its personnel.
