

Partner in demanding
system supplies

Experienced partner at your service

Alumech Ltd specializes in welding assemblies of aluminum and stainless steel as well as cutting of all metals.

Our production facilities are located in Finland and Poland, enabling efficient manufacturing and distribution of products throughout Europe. We manufacture customized products, especially for machinery and equipment manufacturers. However, our customer base also includes logistics, shipbuilding, various industrial sectors, and public sector entities. With our experienced personnel and professional network partners, we can offer comprehensive and demanding turnkey system solutions to our customers, from design to delivery - reliably, precisely, and on time. Contact us to learn more!

Our services

- ✓ Laser cutting
- ✓ Waterjet cutting
- ✓ Bending
- ✓ Finishing cutting edges
- ✓ Welding of aluminum and stainless steel
- ✓ Friction stir welding
- ✓ Surface treatments
- ✓ Mechanical assemblies

Our capacity includes

- ✓ Two state-of-the-art fiber laser cutting machines:
 - 12 kW with a work area of 2,500 x 8,000 mm
 - 20 kW with a work area of 1,500 x 3,000 mm
- ✓ Waterjet cutting machine equipped with four cutting heads, with a work area of 4,100 x 6,100 mm
- ✓ Grinding and finishing of sheets: maximum width of 1,600 mm
- ✓ Three hydraulic press brakes with capacities of 750 tons (8,000 mm), 320 tons (4,000 mm), and 40 tons (1,000 mm). Machines have 6 axes, enabling bending of even complex parts.
- ✓ Cutting capabilities ranging from <1 mm to 50 mm (AL, SS304/316, and Fe plates in stock up to 50 mm)
- ✓ Two friction stir welding machines and a substantial number of MIG and TIG welding machines

The size of the products we manufacture varies from a few millimeters to 18 meters.
