Become a resident of Somero!

In Somero, you really do get value for your money, also from the home owner's point of view. If you feel trapped in your studio apartment in central Helsinki, you can exchange it for a 155 m² house in the center of Somero - with a lake view, of course. Efficient broadband connections provide great opportunities for both remote working and entertainment.

All services are nearby, whereas the concrete jungle is not! Even when living in the center of Somero, you are surrounded by nature. The pleasant park areas in the center and the large yards between houses offer room to breathe. Still, the main road is lively, in case you were wondering.

I knew you'd be interested!

Business in the midst of everything!

It was already noted that Helsinki, Turku and Tampere are only about an hour away. In addition to hundreds of shopping centers and dozens of educational institutions, labor and purchasing power are close by. Entrepreneurs have noticed this, and the number of businesses here is much higher than in an average municipality. And not just any companies, but active and productive companies that also frequently collaborate with each other.

Somero is a genuinely business-friendly town. For example, the pricing of business plots is remarkably affordable. Would you like to be located, for example, in the business area of Ruunala or the industrial area of Harju? In addition to plots of land, there are vacant premises suitable for many needs, for example for various service companies or specialty stores.

All praise their nature...

...but in Somero it is really worth praising. We have here more than a hundred lakes, ridges, forest heaths, hollows, rocks, marshes, green groves, fertile fields and even greener grass.

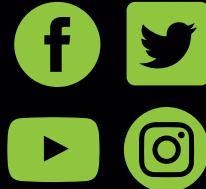

Enjoying the most versatile nature in Southern Finland has been made easy with various hiking and snowmobile routes. And of course, in winter you can also go sledding and skiing.
