# High quality products

High quality and absolute safety are essential to Bet-Ker.

Our main products are refractory materials and precast shapes required in steel industry processes. The products designed and made by Bet-Ker Oy are used with molten metal and slag, which expose the products to heavy thermal, chemical and mechanical stress.

All our products can be customized according to customer needs.

## MIXES

- Tundish wear lining and back lining
- Steel ladle wear lining
- Vibratable and selfflowing castables
- Ladle backfill
- Repairing mixes
- Mortars
- Gunning materials

## PRECAST

- EAF deltas
- Ladle bottom elements
- Tundish furniture
- CAS-OB bells
- Tundish lids
- Tangle elements
- "You name it, we do it"

# Research & development

Over 40 years of experience and continuous development ensure the competitive strength of Bet-Ker Oy products and services.

We practice long-term research and development and have registered numerous patents. Our highly motivated and capable research and development organization designs and develops all our products. We have our own laboratory with a versatile research and testing environment for developing high-quality products to meet the needs of our customers.

Modern, first-rate equipment is used to ensure reliable measurements and the even quality of products.

Bet-Ker Oy designs and produces its own products, which guarantees high-end product quality and gives us the ability to develop the products further.

# Bet-Ker Oy for the customers

We are the local partner for our customers in Nordics. Our customers in Finland and Sweden can enjoy local technical support which provides for example product and process development on site. Together with our own R&D unit, we can provide extremely fast and reliable problem solving because our Technical Support Engineers work at customers processes. In addition, we have the fastest lead times in Nordics, and we supply our standard products to our Nordic customers in 1–4 weeks.

We operate in Ylivieska, Finland within a short distance of the port of Rahja and with excellent transport connections overall that guarantee swift deliveries inside the country and all over the world.
