

CAMTEAM

An injection molding professional
AT YOUR SERVICE

FROM MOLDS TO PLASTIC

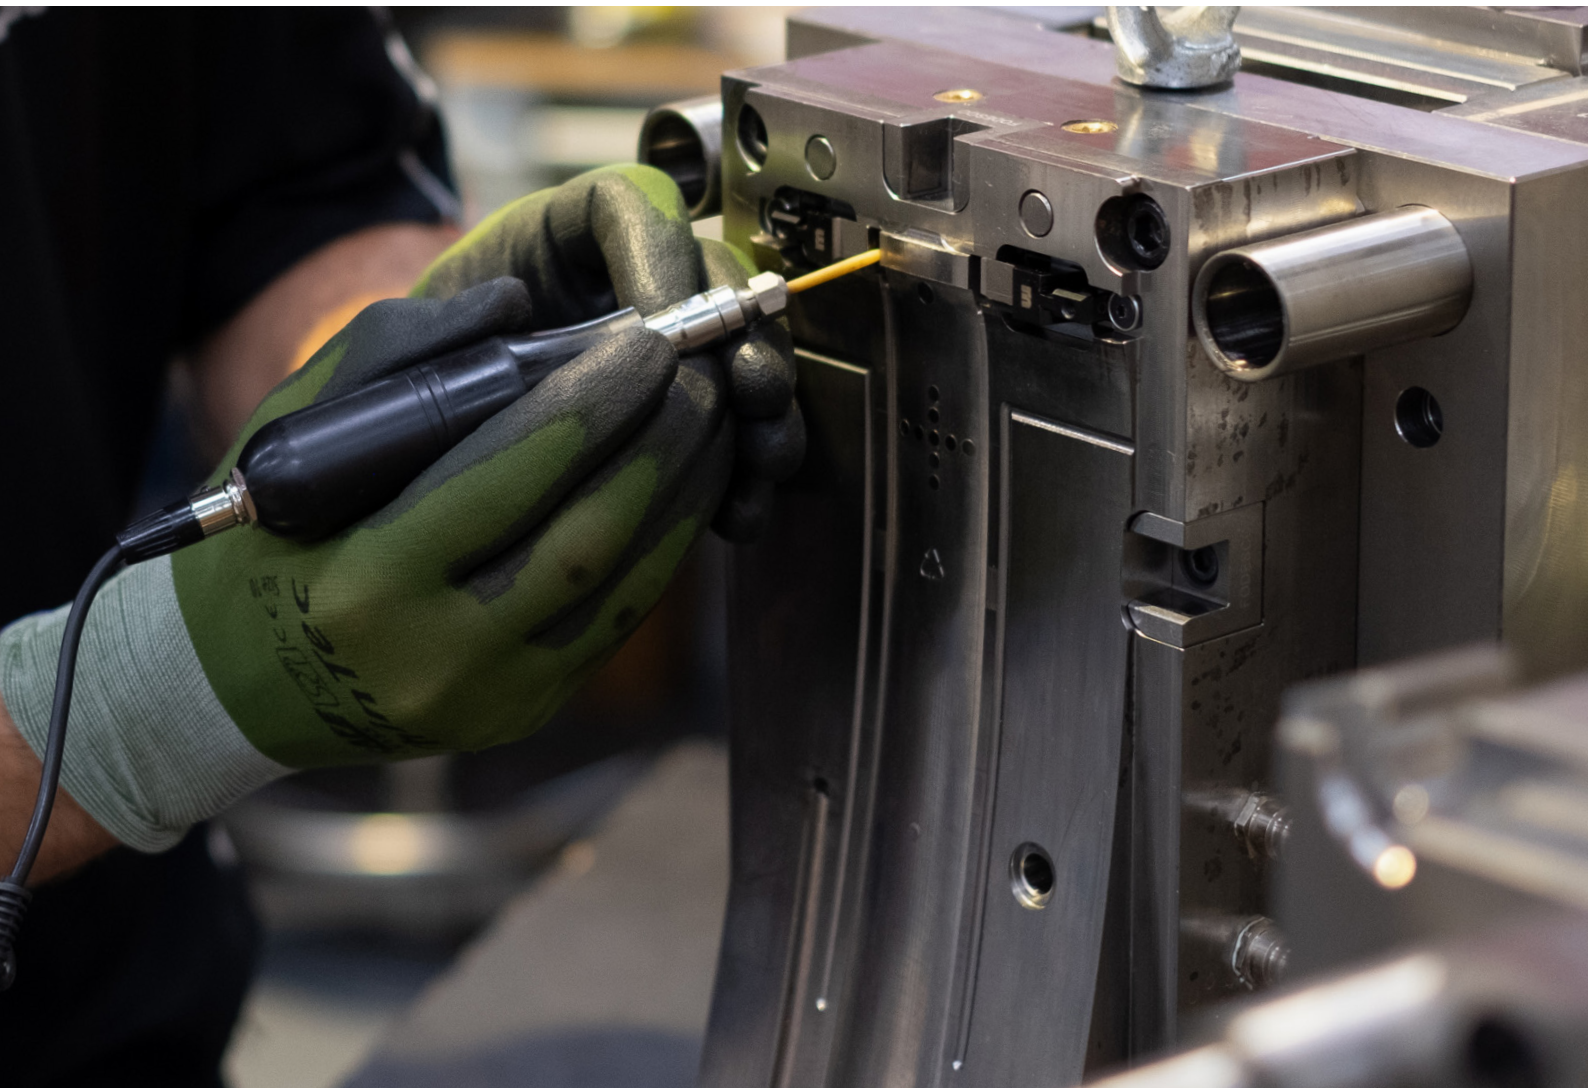

Comprehensive service from **idea** to finished product.

CAMTEAM OY is a Finnish contract manufacturer specializing in high-quality injection-molded parts and molds. We also excel in demanding 1-, 2-, and 3-component parts and molds, as well as gas-assisted injection molding.

We are one of the leading companies in the industry in Finland.

We manufacture even the most demanding injection-molded parts, which are both dimensionally accurate and meet strict visual requirements.

We are a partner to several international publicly listed companies. Small and medium-sized enterprises are also important customers for us—whether they need product development support or high-quality mold and part manufacturing.
