

# Electro Center

**HIGH QUALITY AND RELIABLE ELECTRICAL  
AND AUTOMATION SOLUTIONS**

# The world is electrifying, we will help you

With over 30 years of experience, EC Electro Center designs and manufactures cost-effective electrical and automation solutions.

Our premises are located in Tampere, but we cater for customers all over Finland. The majority of our production is in export.

We are a dependable partner for many of our long-term customers. Thanks to our diverse network, we are able to provide them with comprehensive services.

## Low-emission solutions are today

International and domestic emission reduction targets challenge machine and equipment manufacturers to rethink their business and focus on the manufacture and use of electrical equipment.

We provide our customers with equipment that meets their needs using cleaner energy solutions.

**Ask for more details and for a quote!**

**We serve several different industries:**

- Renewable energy
- Marine
- Mining industry
- Paper industry
- Glass industry
- Ports and Terminals

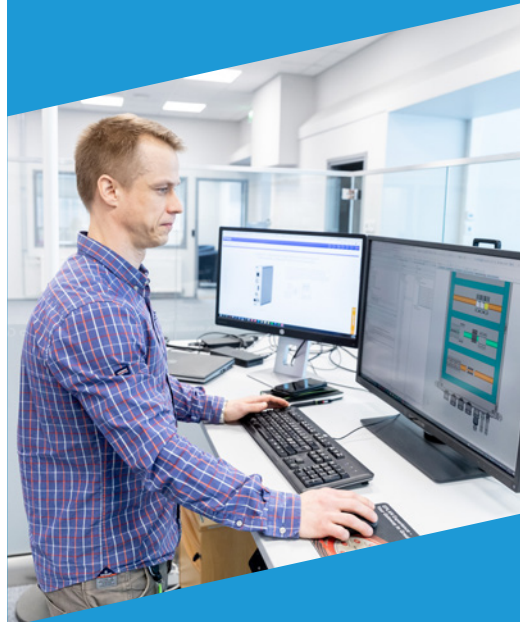

# Our services

We design and manufacture electrical switchboards and facilities for many different industries. Our experienced experts are responsible for mechanical and electrical design as well as component selection.

- **Electrical and automation switchgears and control cabinets**
- **Energy storage and charging stations**
- **Transformer rooms**
- **Tailored power supply E-houses**

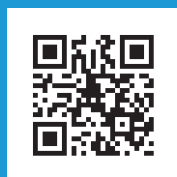

## 5D Laser Perforation Services

We offer machine and equipment manufacturers an efficient and fast way to perforate the enclosures of machine cabinets. When manufacturers want a high-quality end-result, they bring us their cabinets or enclosures for perforation.

# Component sales

We have the widest selection of electrical and automation components in Pirkanmaa in our store: more than 5,000 items from the best-known manufacturers. The store is located on our premises.

Components are also available on our online store. We deliver orders all over Finland and abroad, and if required, we also shelf the products ready at the customer's premises. It is also possible to pick up an order from the store.
