WORKING SAFELY IN
THE WIND POWER INDUSTRY

GWO SAFETY COURSES FOR THE WIND POWER INDUSTRY

The Global Wind Organisation GWO is a non-profit organisation whose members are the world's leading players in the wind power industry. The GWO has defined safety training standards for wind farm personnel, and Meriturva offers a total of three training packages in accordance with these standards. Completion of the training is a prerequisite for working as a wind turbine technician.

Meriturva's GWO training events are conducted in a specifically planned training environment in Lohja. Meriturva can also organise training events at customers' own premises. Training is carried out in co-operation with Swedish Cresto Ab.

GWO BASIC SAFETY TRAINING (BST)

GWO Basic Safety Training (BST) gives you the basic knowledge needed to work safely in a wind power environment. It consists of five modules and must be refreshed every two years.

Fire Awareness

The training gives you knowledge on how to prevent and extinguish fires and how to prepare a risk assessment and a rescue plan.

First Aid

The goal of the training is to carry out safe and effective first aid in a wind power environment.

Manual Handling

The training gives you knowledge of safe working methods and ergonomics.

Sea Survival

The training gives you knowledge on how to safely embark, stay onboard and disembark from a vessel, and what to do in the water if you fall overboard.

Working at Heights

The topics of the training are how to work safely at heights and how to use all the equipment. The participant should be able to perform a rescue and evacuation safely at height.

GWO ADVANCED RESCUE TRAINING (ART)

The goal of GWO Advanced Rescue Training (ART) is to be able to perform a rescue safely and correctly from the Hub, Nacelle, Inside Blade, Basement and Tower.

Hub, Spinner and Inside Blade Rescue (HSIBR)

In the training, you will learn the correct techniques and methods to perform a safe rescue from the Hub, Spinner and Inside Blade.

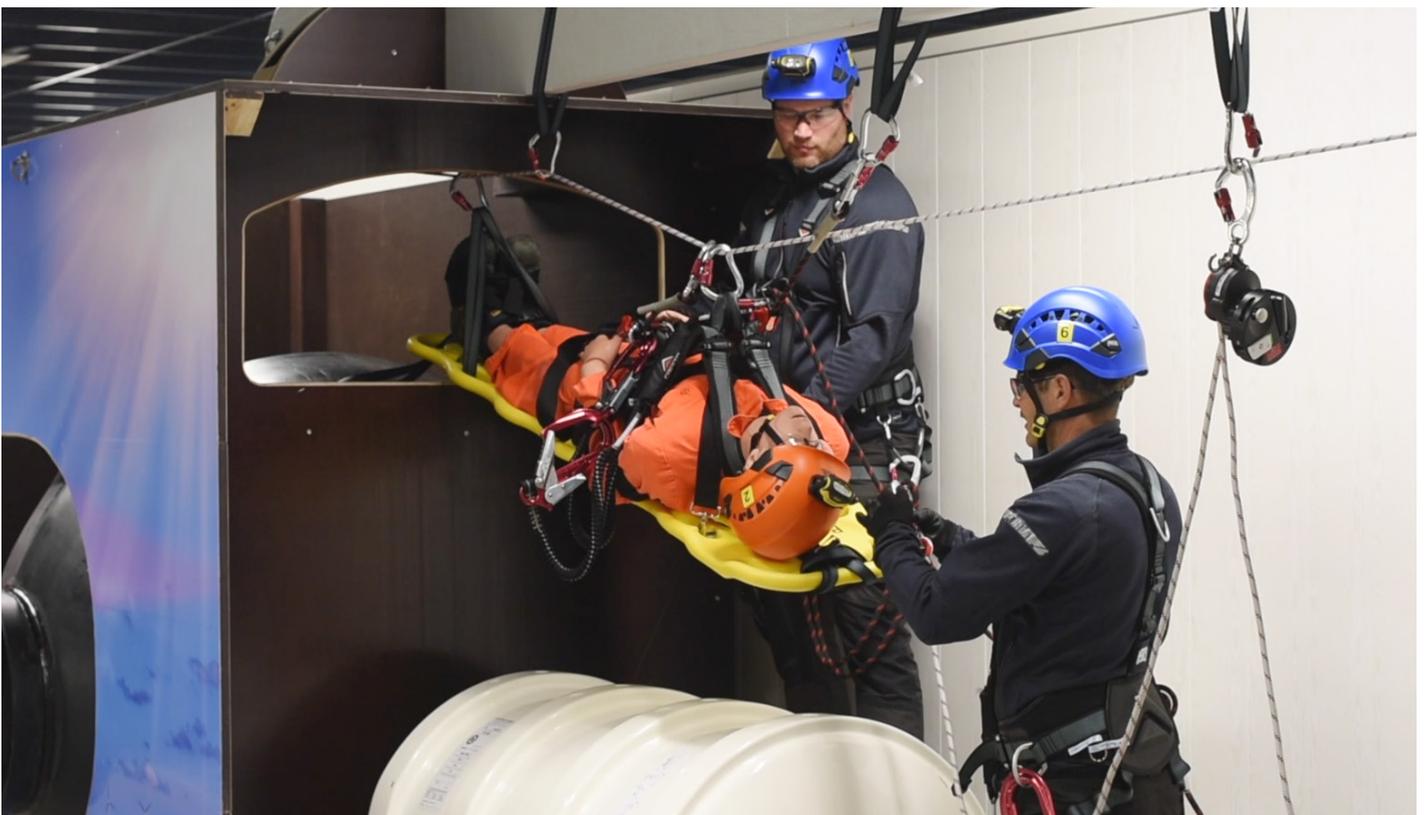

Nacelle, Tower and Basement Rescue (NTBR)

The topic of the training is rescuing a person from Nacelle, Tower and Basement.

Single Rescuer: Hub, Spinner and Inside Blade Rescue (SR:HSIBR)

Single Rescuer: Nacelle, Tower and Basement Rescue (SR:NTBR)

In these trainings the participant should gain an understanding of challenges of the first two modules with a single rescuer.

GWO ENHANCED FIRST AID (EFA)

GWO Enhanced First Aid (Onshore/Offshore)

EFA is training for those who wish to increase their skills in emergency care.

The goal is for the participant to gain more in-depth knowledge and understanding of how to administer first aid and follow medical recommendations over the phone.

Instant Access to **QUALITY TRAINING**

- ✓ Combine tailor-made on-site and online maritime training
- ✓ Add the courses you need in Aboa Mare's online portfolio or ask for a tailor-made solution
- ✓ Instant access to your online training. Web or app.
- ✓ Download your course material for offline training
- ✓ All STCW courses are approved by Traficom (Finnish Maritime Authorities)
