Mining Finland

Global Excellence in Mining Technology

Our member network provides comprehensive solutions to meet the diverse needs of the mining industry worldwide. Mining Finland connects you with the right contacts, whether you're seeking top-tier solutions or considering investment in Finland's globally recognized mining cluster. We also actively support international research and development collaboration in the mining sector. Mining Finland is a non-profit association funded by its members.

MEMBERSHIP FEES:

Large Organizations

Large companies/organizations with over 250 employees and annual revenue exceeding 50 million euros. **€7,000**

Medium-sized Organizations

Medium-sized companies/organizations with 50-250 employees and annual revenue between 10-50 million euros. **€5,000**

Universities and Other

Educational Institutions **€5,000**

Why mine in Finland?

World-class mining technology with deep Finnish roots

- ✔ Mineral-Rich Bedrock: Finland is home to Europe's only chrome and phosphate mines and is the EU's largest producer of gold, platinum, and palladium.
- ✔ Leader in Digitalization: Finland boasts the most advanced digital economy in the EU (European Commission, 2022).
- ✔ Strong Research Ecosystem: Over ten universities and research organizations are dedicated to mining-related innovation.
- ✔ Extensive Expertise: More than 200 companies provide mining technology and services.
- ✔ European Leader in Battery Supply Chains: Finland ranks No. 1 in Europe for the global lithium-ion battery supply chain, supported by a growing supply chain for battery metals, a clean energy grid, and world-class infrastructure (Bloomberg/NEF, 2022).
- ✔ Rapidly Expanding Battery Industry: Finland is at the forefront of developing sustainable battery technologies and expanding its role in the global battery supply chain.

ENDOMINES

Fall in love with Finnish gold

Endomines is a Finnish gold mining and exploration company operating in Pampalo, Ilomantsi, along the Karelian Gold Line. We are dedicated to sustainability, prioritizing environmentally responsible practices, and restoring high-quality areas after production. Our goal is to identify over one million ounces of gold in the area to support our growing gold production.

Finnpartnership

Finnpartnership is a business partnership program funded by the Ministry for Foreign Affairs of Finland and managed by Finnfund, aiming to accelerate development in the Global South through sustainable business. Finnpartnership provides Finnish companies and organizations interested in emerging markets with financial support, advisory services, and contacts to help establish long-term business operations.

The program shares the financial risks associated with starting business activities in developing markets, complementing Mining Finland's goals of providing a platform for its member companies in their internationalization efforts. Currently, Finnpartnership funds several mining companies operating in emerging markets, many of which originated from the collaboration between Finnpartnership and Mining Finland.

Sustainable mining

The mining industry is undergoing significant transformation as companies adopt advanced technologies and practices to achieve decarbonization goals and align with environmental, social, and governance (ESG) standards. Finland stands out with its strong commitment to systematically developing a sustainable mining sector. With a long-standing tradition of mining research conducted in universities and research centers, Finland has become a hub for innovations and technologies that enhance both productivity and environmental responsibility in mining operations.

A dynamic mix of young, innovative SMEs and large, experienced multinational enterprises (MNEs) provides cutting-edge equipment and services covering every stage of the mine lifecycle. These companies play a crucial role in driving sustainability by offering state-of-the-art technologies that help the global mining industry transition toward greener and more responsible practices. Additionally, Finland's active involvement in circular economy initiatives and international partnerships further reinforces its leadership in sustainable mining development.

Socially and environmentally responsible mining

Good environmental, social, and governance (ESG) policies are now a cornerstone for successful and profitable operations in exploration and mining. As the demand for raw materials grows to support a low-carbon future and energy transition, companies face increasing pressure to operate transparently and responsibly within local communities. Securing a social license to operate (SLO) requires open communication, proactive engagement, and efforts to minimize environmental and cultural impacts.

The Sustainable Mining Network serves as a neutral platform fostering dialogue and collaboration between the mining industry and its stakeholders, supporting the development of responsible practices across the sector. For more information visit www.kaivosvastuu.fi/in-english

The Sustainable Mining Network provides a neutral platform for interaction between the mining industry and its stakeholders. www.kaivosvastuu.fi/in-english.

The mining cluster promotes change

Several members of our network provide services that support the circular economy, such as recycling waste rock and water. These solutions deliver significant benefits for both the environment and the economy.

Environmental and economic benefits

- ✓ Reduced consumption of natural resources
- ✓ Minimized energy consumption
- ✓ New raw material opportunities for mining companies
- ✓ Intelligent process equals to money

our current lifestyles.

Finnish way
to the circular
economy.

Innovators
in the mine.

The Finnish mining industry has recognized the broad significance of the circular economy. Mine waste rocks and tailings are already being utilized in a variety of ways. Although the volumes of utilization are not yet large compared to the amount of waste rock and tailings generated, the added value achieved is typically significant. New technologies are being developed, for example, to recover raw materials from mining wastewater.

Eija Rotinen

Ambassador for Bio and Circular economy

Key player

in a fantastic world of lime

SMA Mineral is one of Northern Europe's leading producers of lime. Modern mining requires limestone, quicklime and slaked lime for pH regulation but also for stabilization, drainage, filling and filtration.

We would love to become your partner!

Magnus Minerals – Your partner in Finland

Magnus Minerals is a private Finnish prospect generator company focused on mineral exploration. Our team is comprised of 12 entrepreneurially-minded geoscientists with a strong understanding of Finnish geology, geophysics, mining law, and tenure-related issues. Our expertise includes industry-leading knowledge in the stratigraphy of the Central Lapland Greenstone Belt (see publication: Haverinen, J. 2020). Magnus' project portfolio includes Joint Ventures with Boliden, formerly Rio Tinto, and other mining companies.

We also have our own early-stage development projects, some of which are in separate, private corporate vehicles, and some in publicly-listed junior mining companies e.g. FireFox Gold (TSX-V:FFOX) and Nordic Nickel (ASX:NNL). Our work is focused on exploration for base metals (e.g., nickel, copper, PGEs, and cobalt), with most of our projects located in Northern Finland. From target areas, we produce new interpretations of geology, geophysics, and prospectivity.

Magnus Minerals is continually creating new business opportunities with current and future partners. We understand that your needs are unique. Contact us, and let's create a mutually beneficial approach to make a new mineral discovery in Finland.

on underground mining.

Callio is a globally unique multidisciplinary operating environment.

The Pyhäsalmi Mine, located in the town of Pyhäjärvi, Finland, is one of the deepest known mines in Europe reaching 1,445 metres underground. As mining will end, a globally unique multidisciplinary operating environment, Callio, will emerge. The mine and the surrounding brownfield area offer a diverse range of opportunities for success for new and innovative projects and established operators seeking new horizons alike.

YOUR LIFETIME PARTNER IN MINING

We help our partners enhance safety, sustainability, and productivity throughout their project lifecycles with industry-leading products, technologies, services, and solutions.

We provide solutions for:

- ✓ Explosive charging
- ✓ Scaling and rock breaking
- ✓ Rock and ground support
- ✓ Water control
- ✓ Concrete spraying and transportation
- ✓ Lifting and installation
- ✓ Underground logistics

■ EXPLORATION AND MINING

Finland has a rich geological landscape with untapped mineral potential, making it an attractive destination for mining companies. Additionally, Finland has a stable political and regulatory environment, transparent permitting processes, advanced infrastructure, and a skilled workforce, all of which create a favorable atmosphere for exploration and mining activities. This combination of geological potential and favorable operating conditions has contributed to the success of exploration in Finland.

■ MINERAL PROCESSING

Mineral processing in Finland is highly effective due to a combination of factors. These include advanced research and innovation, state-of-the-art technology, close industry-academic collaboration, and a focus on sustainable and efficient practices. Additionally, Finland's mineral-rich geology provides ample opportunities for hands-on learning and practical experience in mineral processing techniques, further enhancing the effectiveness of education and practices in this field.

■ CLOSURE / REHABILITATION

Closing or rehabilitating a mine in Finland is known for its safety and environmental friendliness due to a few key factors:

- ✓ Stringent Regulations
- ✓ Environmental Considerations
- ✓ Financial Responsibility
- ✓ Research and Innovation
- ✓ Collaboration
- ✓ Expertise and Knowledge Sharing
- ✓ Long-Term Planning
- ✓ Public Awareness and Engagement

APPLEBLOSSOM M.I.

Appleblossom M.I. Limited is a manpower, project management & consulting company providing extensive network and knowhow related to business development & partnership between Nigeria and the Nordic Countries.

ARCTIC DRILLING COMPANY

ADC offers high-quality certified drilling and state of the art drill rigs. Downtime is the common enemy and we attack that with improved safety, fastest set-up times and high mobility - even in extreme conditions. Our portfolio has the right customizable products to minimize the costs of your drilling.

ARVO METALS

Arvo Metals is exploring and developing lithium deposits in Central Ostrobothnia, Western Finland, to secure raw material supplies for the battery industry. We use a high level of expertise and efficient methods to make discoveries and aim to develop lithium production in a short timeframe. We minimise adverse impacts by following best environmental, social and safety practices and integrate their assessment into all our operations.

ASTROCK OY

Astrock provides geophysical consulting covering wide range of methods from airborne to ground and borehole geophysics. We also provide geophysical instrumentation and surveys specializing in borehole logging.

ATTENTION COMMUNICATION

Attention Communication supports you in demanding situations which require leadership and communication. We accelerate change, strategy implementation and sustainability development in your organization. We also prepare you to face challenges, the press and survive in a crisis. Let us help you move your business forward!

AUROX COMPOSITES AND COMPOUNDS OY

AUROX Composites and Compounds Oy specializes in the production of backing-, locking- and wear resistant compounds based on epoxy resins for large gyratory and cone crushers.

B2GOLD

B2Gold is a low-cost international senior gold producer headquartered in Vancouver, Canada. Founded in 2007, today, B2Gold has operating gold mines in Mali, Namibia and the Philippines, a mine under construction in northern Canada and numerous development and exploration projects in various countries including Mali, Colombia, and Finland

BEACON EVENTS

IMARC, Australia's largest mining event, brings together global industry leaders for collaboration, innovation and discussions on the future of mining.

BERNER CHEMICALS

We manufacture safe magnesium chemicals by using unique production technology. Our main products are high purity magnesium sulfate solution and heptahydrate, as well as magnesium hydroxide.

Finnish Steel and Metal Producers

Finnish Steel and Metal Producers is one of the five key industry associations within Technology Industries Finland.

Our wide-ranging portfolio includes steel and copper products, stainless steel, zinc, nickel, as well as comprehensive technology and service provisions.

HARDOX WEAR PLATE

In raw material handling, wear resistance is a key factor for operations in mines and quarries. SSAB's Hardox® wear plate offers a unique combination of toughness, hardness and workshop properties. It's excellent toughness enables end users of mining and quarrying equipment to use even higher hardness levels, resulting in life-cycle cost advantages and less downtime.

HYCAMITE TCD TECHNOLOGIES OY

Hycamite decarbonises the industry by producing clean hydrogen and industrial[1] quality solid carbon. Our proprietary zero emission technology is based on methane molecules' thermo-catalytic decomposition (TCD). The pyrolysis technology requires only 13% of the energy needed to produce hydrogen by electrolysis.

IMA ENGINEERING LTD OY

Ima Engineering's products and services can make the difference between profitability and loss for an operation seeking to improve information used by management. In the mines and concentrators IMA cutting edge sensor technology and on-line solutions can reduce waste rock dilution and ore losses.

IMDEX

At IMDEX, we create technologies that enable you to safely find, define and mine orebodies with precision and at speed.

IMPOMET

Impomet Oy is a wear protection specialist for bulk material handling systems. We provide custom-fit linings against abrasion and impact wear.

People for Process Automation

OY INFRACONSULTING AB

Oy InfraConsulting Ab Ltd (IC) is an innovator, developer and manufacturer of energy and cost-effective water technologies. Our revolutionary desalination technology is a new step in water treatment, freshwater production, and brine extraction.

JS SUOMI OY

At JS Suomi we are specialized in producing Interactive Brochures and videos – targeted specifically at the recipients and funded by suppliers. We have done several successful projects for the Finnish mining companies, associations and educational units and are happy to offer our marketing services for the industry. As a new service, you can now inquire about website development from us.

KALLIOLAW

Kalliolaw Attorneys Ltd was one of the first Finnish law firms to specialise in mining and exploration and has been for years recognized as the leading mining law firm in Finland. Most often, we are the first contact when mining and exploration companies enter the Finnish market.

KELIBER OY

Keliber is a Finnish mining and battery chemical company that aims to start the sustainable production of battery-grade lithium hydroxide, utilising its own ore, in 2024. Our estimated annual production is approximately 15,000 tonnes of battery-grade lithium hydroxide monohydrate for the needs of the growing international lithium battery market.

KPEDU

Kpedu is a multidisciplinary and actively developing educational organization that organizes basic and additional vocational secondary education, preparatory education, apprenticeship training and folk high school education. Kpedu is also an active developer of the region and its livelihoods.

STRESS MEASUREMENT COMPANY OY

EXTENSIVE AND COMPREHENSIVE OFFER OF ROCK MECHANICS LABORATORY SERVICES.

WORLD-CLASS QUALITY IN-SITU STRESS MEASUREMENTS FROM TUNNELS AND SURFACE FOR MINING AND INFRASTRUCTURES PROJECTS.

DISCOVER MORE:
WWW.SMCOY.FI/SERVICES

KUPUKAN GRAFIITTI

One hundred % Finnish owned Junior graphite Exploration Company. Kupukka Graphite Project has potential to significantly increase graphite resources in Finland and in the EU.

LAITEX

 Laitex delivers durable material handling equipment for the metals, minerals, and mining industries, supporting concentrators, refineries, and tailings plants worldwide. From design to installation, Laitex's solutions ensure efficient dry material handling. Laitex also offers comprehensive life cycle services to ensure long-term performance and reliability.

LAIVA GOLD

 The Laiva gold mine is located in Finland, owned by Laiva Gold and is one of the largest gold deposits in the Nordic region based on current reserve estimates. State of the art 6,000 tonnes per day gold processing facility and plans to restart production during summer 2023.

LCC

 Kokkola LCC Oy offers superb laser coatings for industrial needs. Laser coating suits new components and components in need of refurbishing. Laser coating has been used mining industry in the field and process. It often guarantees longer lifetime or saves expensive components from early scrapping.

LEKATECH

 Established in 2018, Lekatech Oy is a Finland based technology company, specialising in the development of linear electric technology for hammering applications. Iitti headquartered Lekatech is now considered the global leader in the use of electric technology for the manufacturing of hammers specifically for the mining, quarrying, and construction machinery segments. The company's pioneering development, and a world first, is the Lekatech Electric Hammer. Lekatech is growth oriented, being recognized by several European funding instruments and globally by leading OEMs and end users.

LUCAMAR

 LucaMar International is a Canadian-based company serving foreign customers in North America and worldwide. We specialize in eco-friendly solutions for CO2 reduction, biotechnology, concrete, and mining, driving business success through innovative and sustainable technologies.

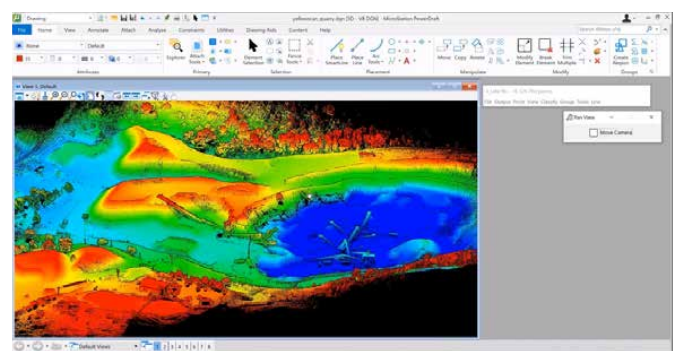

Every mining environment is unique and complex. Accurate high quality LiDAR point clouds and their visualizations with Terrasolid software tools give an in-depth view of the mine – its structure and machinery placements.

3D Digital Twin made of point cloud data allows comprehensive analysis of the mine and helps to optimize the mine site planning and operations including stockpile volume control, environmental monitoring and detecting potential hazards.

www.terrasolid.com

LUMO ANALYTICS

Lumo Analytics offers rapid on-site geochemical and mineralogical analysis of drill cores for ore exploration and mining, using laser-induced breakdown spectroscopy (LIBS). This technology uniquely identifies all elements, including traditionally challenging ones like carbon and lithium, empowering geologists and metallurgists to optimize operations effectively based on data.

MAGNUS MINERALS

Magnus Minerals Ltd. is a private Finnish prospect generator company focused on mineral exploration. We have decades of experience in prospecting and consulting on mineral exploration in Finland.

MAGNUSSON FINLAND

Magnusson, the international business law firm, has experienced teams advising clients on such as corporate and M&A, employment, technology, disputes, environmental, energy and mining law. Our mining team has particular experience in advising prospecting and mining exploration companies on contractual, financing and permitting issues. We have offices in Finland, Sweden, Denmark and the Baltics, and an extensive international network with other law firms, enabling us to serve our clients in other jurisdictions around the world

MAGSORT

Your partner in slag processing. Magsort can recover all the metal in slag and turn it into valuable sellable commodities.

MEFFA LAB OY

MEFFA LAB Oy is a provider of soil geochemistry services and automation solutions for portable analytical instruments. We developed a new, revolutionary method of Multi-Element Fine Fraction Analysis. MEFFA Lab Oy offers geochemical survey on your targeted area.

Laboratory services
for exploration
and mining

The image shows a laboratory setting with several small, dark-colored crucibles arranged in a grid. Three of the crucibles are being filled with a bright yellow liquid, likely molten metal or a reagent. The Eurofins Labtium logo is overlaid on the image, featuring the company name in a white sans-serif font and a stylized orange and white graphic element. Below the logo, the website "WWW.EUROFINS.FI" and the email "MYYNTI@EUROFINS.FI" are listed.

MERUS POWER OYJ

Offers proven power quality solutions for the mines across the world. Our solutions increase productivity of different mining processes by improving payload of the large motors. Mine operators and owners also benefit from improved power quality in terms of energy savings, reduced process disruptions and longer lifetime of capital equipment.

METABAR®

Metabar®. Pioneering the use of smart liquid and gas distribution system with metal 3D printed (AM) atomizers that cleans, washes, humidifies, prevents dust, coats, cools and disinfects sensitive materials - from skin to vegetables and challenging industrial materials. Supports industry from small to large and volume scale solutions with patented sustainable technology and customized applications.

METSO

Metso is a frontrunner in sustainable technologies, end-to-end solutions and services for the aggregates, minerals processing and metals refining industries globally. We can support you in improving your operations' energy and water efficiency, increasing productivity, and reducing environmental risks with our product and service expertise. With our 140 Planet Positive solutions, we are the partner for positive change.

MILLER THOMSON LLP

With close to 520 lawyers based in 10 offices across the country, Miller Thomson LLP offers a complete range of business law and advocacy services to facilitate cross-border and multinational transactions and business needs. Our Mining Industry expertise includes, but is not limited to, Mining, Financial Services, Corporate/Commercial, M&A, Corporate Tax, Environmental and Labour & Employment.

KATERA STEEL OY

FLOATING PUMP STATIONS AND STEEL STRUCTURES FOR THE MINING INDUSTRY

**When your need is steel,
we will carry it out!**

A versatile workshop with
over 60 years of experience

www.katerasteel.com

MILLISECOND OY

Millisecond Digital creates data analytics solutions for predictive planning and control of business-critical equipment. We specialize in harmonizing massive volumes of data from multiple vendors and system types – connecting different machines, environments, and individuals through standardized interfaces and signals.

MITTA GROUP OY

 Mitta Group is an internationally operating surveying and geotechnical consulting company with extensive operations in Finland, Sweden  and Norway. Our core competencies for the mining industry include  geotechnical and laboratory services as well as various surveying and monitoring solutions.

MITTAUSGURU OY

 Mittausguru Oy provides real-time environmental monitoring solutions designed for harsh field conditions. Our off-grid stations  monitor water flow, quality, ground and weather conditions at your site, in real time all year around. Measurement data is easily accessed and analyzed in our secure browser-based cloud service.

MIKRONIA CONSULTING

 Mikronia Consulting offers geological, mineralogical, and microscopical consulting, data services, and tailored training for the mining industry

MUON SOLUTIONS

 Muon Solutions uses cutting-edge density imaging to uncover resources, enhance safety, and assess structures perfect for mining and exploration.

MYELIN

Myelin Oy stands as a committed consulting partner, specializing in fortifying organizations to thrive in complex and unpredictable environments, particularly those marked by fragility and conflict-related challenges.

NEWPAAKKOLA

NewPaakkola is a comprehensive supplier of material conveying systems for the mining and basic industries, from design to installation. We are experts in modernization, maintenance and components of the conveyor lines.

NIHAK

NIHAK offers regional business development services, helps companies in our region to internationalize and promotes our region's possibilities nationally and internationally. We also promote investments in the region and conduct a continuous dialogue with municipalities, landowners, and potential investors.

NIREMET

Products: primary metal (cathodes, coils, sheet, ingot/blister, rods), secondary metal (scrap), metal residues (sludge, filter cake, oxides, slag, runnings, turning, grindings, spent catalyst) with elements Ni, Cu, Co, W, Mo, V, Zn as well as Au and Ag.

PAVILJONKI 4.-5.11.2026 JYVÄSKYLÄ

FINNMATERIA

MINING | REFINING | RECYCLING

THE LEADING TRADE FAIR OF THE
EXTRACTIVE INDUSTRY IN THE NORDIC
COUNTRIES

FinnMateria gathers extractive industry and circular economy professionals every two years in Jyväskylä, Finland, next time on November 4-5, 2026.

FinnMateria covers the entire life cycle of inorganic material from mining to refining and recycling. The event showcases the latest technologies and provides a platform for professionals to meet face-to-face.

finnmateria.fi

NORDIC DRILLING BOX

 We provide a high-quality storage system for drill core samples, offering wooden core boxes for every sample size, pallets made to fit the box dimensions, as well as cover lids and other accessories. If long-term storage is not required, we recommend our NDB Greenway recycling option for the core boxes.

NORMET OY

Normet provides advanced solutions for selected customer processes in underground mining and tunneling. The company has 50 years of experience in the development, production and sales of equipment and vehicles for underground mining and tunnel construction. Concrete spraying and transport, explosive charging, lifting and installations, underground logistics and scaling.

OINRIDE

Oinride Oy is a Finnish startup specializing in robotics solutions tailored for harsh environments. Our mission at Oinride is to develop innovative robotic technologies that address the challenges faced in demanding environments such as underground mining, construction sites, and disaster zones. AutoJoe®, our flagship six-wheel fully electric tough robot combined with ControlWire® software, enables us to provide customers with increased productivity, safety, and efficiency. We are here to enhance productivity and mitigate risks in hazardous working conditions.

OULU UNIVERSITY

 The Faculty of Technology at the University of Oulu is one of the leading experts in sustainable utilization of natural resources. Oulu  Mining School (OMS) is an education and research unit in engineering  and geosciences at the University of Oulu, which significantly  strengthens the University's expertise in natural resources and  sustainability.

OWATEC

 Owatec Group is a Finnish growth company expanding to the  international market with our modular Plug and Play –wastewater  management systems. We are an environmental cleantech company specializing in industrial wastewater and sludge management and efficient handling and recovery of valuable components from side streams. One of our strongest areas of expertise is handling wastewater and valuable side streams in the mining industry.

PALSATECH

 Wide range of geoservices for the exploration and mining industry! Palsatech has developed a unique, cost-effective, and comprehensive service concept to serve the needs of exploration and mining. Our services include geological and technical mining and exploration services.

■ PEIKKO

Peikko Group Corporation is a leading global supplier of slim floor structures and connection technology for precast and cast-in-situ construction. Peikko's innovative solutions offer a faster, safer, and more sustainable way to design and build. Peikko has sales offices in over 30 countries in Asia-Pacific, Europe, Africa, the Middle East, and North America, with manufacturing operations in over ten countries. Peikko was founded in 1965 and is headquartered in Lahti, Finland.

■ PRO ESTORE

Pro Estore is a metalworking service provider located in Rovaniemi and therefore close to the northern mining industry. Pro Estore offers the most efficient CNC -machining centers and CNC-lathes allowing cost effective manufacturing. Our surface treatment services include anodizing, galvanizing, priming, painting and demanding heat treatments.

■ PROFIMA ACCOUNTING OY

Profima provides virtual CFO services. From reporting to forecasting, we got your financials covered. We work closely with our customers as one team aiming for the same goals.

MUON

SOLUTIONS

Our novel density scanning services help you locate mineral deposits, investigate tunnel integrity, see inside mountains and hills, and analyse bedrock and waste rock piles.

- Maps in 2D, 3D or time-lapse
- Operates down to 1 km depth
- Reduces risk, enhances safety
- Cost-efficient novel technology
- Safe for workers and environment

Follow us on LinkedIn

PROMETEC

Prometec offers automated sampling for the mining industry by taking samples directly from the load for accurate, efficient, and unbiased concentrate quality control.

QIDE OY

Qide Oy provides software development and website development services utilizing Central Asian developer resources and also helps Finnish companies to establish business connections in the region. We are at our strongest in web development and mobile applications, including their background systems.

RADAI LTD

Radai provides geophysical surveys using Unmanned Aerial Vehicles. They are specialized in exploration, field work and logging, geophysical and geotechnical measurements, geophysical and geotechnical measurements and interpretation.

RESOURCE MINING CORPORATION LIMITED

RMI has assets located in Finland and Tanzania targeting the critical metals necessary for the successful transformation to green energy, specifically Lithium and Nickel. We have 8 projects, including the Rousekerro Nickel Sulphide project, located in Finland with a JORC complainant resource of 42Mt Ni, containing 168kt of Ni.

RF VALVES OY

Manufacturer of heavy-duty valves for abrasive, corrosive, aggressive and plugging slurries, liquids and powders - for applications in metallurgical, minerals, pulp and paper, chemical, power generation and municipal industries. Valves we manufacture are Pinch valves, Knife gate valves, Slurry knife gate valves and Air Release valves.

ROCK PHYSICS FINLAND

Rock Physics Finland Ltd specialises in the physical properties of rocks, rock mass and building materials. We offer next-level petrophysics services from laboratory measurements to data quality control, process development and training.

Rock Physics Finland

ROVJOK

ROVJOK digitises your mining operation. We combine and interpret operational and financial data across the entire value chain, giving you the context you need to perform advanced business and data analytics; in near real-time. ROVJOK's solutions are only possible with our world-class team.

rovjok

ROXIA

Roxia provides high-tech dewatering solutions, services, and industrial automation, specializing in the mining, minerals, metallurgy, chemical, food, and pharmaceutical industries.

ROXIA

RUPERT RESOURCES (RUPERT FINLAND OY)

Rupert is a Finland focussed exploration and development company that is listed on the TSX Venture Exchange in Canada. The Company owns the Pahtavaara gold mine, mill, and exploration permits and concessions located in the Central Lapland Greenstone Belt in Northern Finland.

RUPERT
RESOURCES

SAMAT NORDIC

Samat Nordic Oy, the Finnish subsidiary of the French family company Samat Group, is the leading provider of total logistics services in liquid chemicals in Finland, northern Sweden and Baltic Sea region. The company also has chemical warehouses in the ports of Hamina and Rauma in Finland.

SANDVIK

Sandvik is a global, high-tech engineering group providing solutions that enhance customer productivity, profitability and sustainability. In Finland, Sandvik develops new technology solutions for the global mining industry.

SAVONIA UNIVERSITY OF APPLIED SCIENCES LTD

Savonia University of Applied Sciences Ltd is one of the largest and most versatile Universities of Applied Sciences (UASs) in Finland with diverse RDI and business activities. Savonia has developed its capacity for water safety over 20 years and is offering specialised facilities and providing practical testing and piloting services.

**SAVONIA**

SAVO-SOLAR OYJ

Savo-Solar manufactures the most efficient solar thermal collectors and based on those delivers large-scale solar thermal systems. Focus is on large-scale applications like district heating, industrial process heating and real estate systems - market segments with a big potential for rapid growth.

SEW EURODRIVE

SEW-EURODRIVE Oy is specialized in drive technology. Value to the mining industry with products, services and solutions – one partner.

SITOWISE

Infrasuunnittelu Ltd offers infrastructure and environment design, construction management, and supervision services for the mining industry. Our mission is to deliver sustainable infra solutions and coherently coordinate the changes in infrastructure throughout the life of the mine.

**SITOWISE**

**KOMATSU**

SLEIPNER FINLAND OY

Sleipner Finland is a manufacturer of a safe and innovative transport systems for tracked machines: excavators, dozers and drill rigs. Sleipner systems can increase operational time hundreds of hours per unit, decrease maintenance costs considerably and reduce CO2 emissions and fuel consumption at least 85% while travelling.

SMA MINERAL

SMA Mineral Oy supplies carbonate products based on limestone and dolomite, as well as burnt and slaked lime products made from them.

SMARTNORTH

SmartNorth has extensive expertise to support companies and their stakeholders to build strategic partnerships and capitalise on the various EU financing. We can help you navigate the financial landscape and support access to innovation funding and financing streams leveraging sustainable growth.

SOFI FILTRATION

Sofi Filtration designs and sells advanced fine filtration technology to treat process waters and increase recovery of fines in mineral processing.

SOLIDCOMP

SolidComp specializes in reality-based digital twins, that benefit all the people and stakeholders working in a facility.

Smart and durable solutions for the mining industry

With over 30 years of expertise, we deliver sustainable, tailored polymer technologies designed to meet the challenges of demanding mining applications.

TEKNIKUM

SOTKAMO SILVER OY

Sotkamo Silver's business concept is to exploit mineral deposits in the Nordic countries with regards to human society and environment. Sotkamo Silver owns, through its subsidiary mineral deposits. The Company's main development project is the Silver Mine project in Finland.

SRK CONSULTING

As global leaders in technical due diligence, we routinely help clients assess their project risks and opportunities, including exposed assets. .

SSAB

SSAB is a Nordic and US-based steel company that builds a stronger, lighter and more sustainable world through value added steel products and services. Working with our partners, SSAB has developed SSAB Fossil-free™ steel and plans to reinvent the value chain from the mine to the end customer, largely eliminating carbon dioxide emissions from our own operations. SSAB has employees in over 50 countries and production facilities in Sweden, Finland and the US.

SSG

SSG provides standardized solutions for Nordic industry to improve work safety and safety collaboration between industrial sites contractors and partners. Mining industry is one of our focus areas.

STRESS MEASUREMENT COMPANY OY

Stress Measurement Company Oy (SMCOY) is a rock mechanics consulting firm focused on the measurement and assessment of in situ stresses in rock facilities. Our state-of-the-art LVDT-cell provides fast and reliable measurements from tunnels and excavations surfaces. At the same time, we offer a broad range of laboratory testing for rock mechanical properties, such as peak strength, joint mechanics, drillability, abrasivity and many more suitable for diverse infrastructure projects, such as mining, construction, tunnel boring, etc. More than 10 years of experience and the biggest mines in Scandinavia back up our services.

SWEROCK

Swerock is one of the largest suppliers of materials and services in the construction and earthworks industry in the Nordic countries. Our offer includes the manufacture and sale of concrete, gravel and crushed stone as well as opencast mining in Finland.

TARABA STATE NIGERIA BUREAU OF SOLID MINERALS

The Taraba State Nigeria Bureau of Solid Minerals oversees mineral exploration, regulation, and sustainable development in the mining value chain, promoting economic growth and environmental protection.

TEKIR

Tekir is a strategic communications and public affairs firm. We offer a full range of services and specialize in challenging strategic communications and reputation management. Tekir employs 30 communications, public affairs and business experts.

TEKNOVENTURE

We have solid experience in strategic management, corporate governance, and corporate finance, as well as a wide range of stakeholder networks in Finland and abroad. Supporting operational management in its core assignments is one of our strong areas.

StratiSampler 

StratiSampler

- Worlds smallest automatic sampler
- Sampling during production drilling
- Correct sample data
- Driller operated
- Less energy consumption
- Less tailings – more to sell

Contact us

erik@stratisampler.fi

TERRAFAME

 TerraFame enhances low-carbon mobility with responsible battery chemicals. The carbon footprint of nickel sulphate is among the smallest in the industry. One of the world's largest production lines for chemicals used in EV batteries is located on TerraFame's industrial site in Sotkamo, Finland.

TJA MECHANIC

 JA-Mechanic Oy is a leading developer and manufacturer of EXSTRE strain relieving devices and cable clamps. We also specialize in designing and manufacturing customized products to meet our clients' specific needs. The patented structure of the product is excellent for strain relief and pulling of cables and hoses. Perfectly suited for underground mines, open pits, tunneling and other industries.

VAISALA

 Vaisala is a global leader in measurement instruments and intelligence for climate action. We equip our customers with devices and data to improve resource efficiency, drive energy transition, and care for the safety and well-being of people and societies worldwide.

VALMET FLOW CONTROL

 Reliable flow control, filter fabrics, automation technology and services for demanding mining, metals and steel applications.

VELJEKSET TOIVANEN

 Veljekset Toivanen Oy is a family-owned company founded in 1983, employing over 400 professionals. Our mining services cover both underground mines and open-pit quarries.

VTT TECHNICAL RESEARCH CENTRE OF FINLAND LTD

 VTT is one of the leading R&D&I organisations in Europe. Our research and innovation services give our partners, both private and public, all over the world a competitive edge. We pave the way for the future by developing new smart technologies, profitable and sustainable solutions and innovation services.

WATMAN ENGINEERING

WatMan Engineering Ltd Oy is Finnish manufacturer of customized water treatment systems. Since our establishment, our primary focus has been to design, manufacture and supply innovative water treatment equipment of the highest quality, for customers who demand more..

WEEEFINER

Weefiner is a Finnish pioneer using its 4D Scavenger® technology for innovative water purification and metal recovery, promoting sustainable practices.

WEIR MINERALS FINLAND

Field of the future

The evolving mining industry needs new experts.

The demand for metals has surged over the past decades, driven by technological advancements and the global shift towards sustainable energy solutions. While recycling efforts are becoming more efficient, the total amount of metals mined to date is insufficient to meet current and future demands. Consequently, responsible and environmentally conscious mining practices are essential to bridge this gap.

Finland boasts a rich history in mining, underpinned by internationally recognized metallurgical technology, equipment manufacturing, and service provision. The country's commitment to education and research has solidified its reputation within the global mining community.

The mining industry in Finland offers many opportunities for research, companies, investors and employees. Please contact us for more information. miningfinland.com

As the industry embraces new technologies, there is a growing need for professionals with diverse skill sets. The integration of remote work, digitalization, and flexible arrangements is reshaping traditional roles, presenting exciting career opportunities with competitive salaries for skilled individuals.

Finland's mining sector offers a wealth of prospects for researchers, businesses, investors, and employees. For more information, please visit miningfinland.com.

University of Oulu

– High-level, impactful science and education

Sustainable utilisation of natural resources is one of the key expertise areas in the University of Oulu. Our target is to be among the world's leading actors in research, sustainable solutions and education on how people can use technology to control climate change and promote sustainable development and wellbeing.

Oulu Mining School (OMS) aims to integrate scientific disciplines along the value chain from exploration to mining and mineral processing. In addition to providing the only mining engineering programme in Finland, OMS runs a miniscale mineral processing factory in their premises.

If you need a partner in research, education and innovation activities, explore our opportunities and come build your future with us!

LEARN MORE

Moving industry towards net zero

NewPaakkola's sustainability approach is built around minimizing environmental impacts through responsible, advanced material handling solutions.

Waste rock handling systems

Innovative conveyor solutions improve the movement of waste rock, minimizing environmental degradation such as soil erosion and contamination of water sources.

Dry stacking solutions

NewPaakkola's advanced Dry Stack Tailings (DST) solutions provide a safe, sustainable, and space-efficient way to manage tailings, reducing land use, environmental impact, and improving water management.

Our solutions enable

- Smaller carbon footprint
- Saves water resources
- Lower noise and dust emissions
- Better work safety
- More efficient land use
- Better cost efficiency

Reach out to learn how we can boost performance and cut emissions.
