

A RELIABLE PARTNER

Extensive Service packages from design to production and Installation

Multidisciplinary close to the

OMP GROUP, founded in 1964, has evolved into a diverse conglomerate specializing in engineering, construction, and industrial maintenance.

Operating internationally, OMP aims to enhance customer profits and competitiveness by providing value-added products and services. Guided by various ISO certificates, we ensure quality in our processes, collaborating on significant projects like OL3 Nuclear powerplant. Today, we export to multiple countries and continually expand by developing products like floodgates, set dams, and acquiring businesses with sought-after offerings, such as Vapor boilers and pressure vessels.

RESPETRA® IN CASES OF EMERGENCY

RESPETRA Rescue Chambers and Rescue Rooms provide extra time and flexibility for making a rescue plan and implementing measures. They work completely independently, are always ready to use and hold all the necessary equipment to cover operation up to three days. Rescue Chambers and Rescue Rooms are designed for 8–14 persons. The operating time can be adjusted between 8–72 hours, according to local needs and safety regulations.

- Respetra Rescue Chambers are gastight and have normal breathing air inside.
- There is no need for breathing masks when inside.
- The entrance area of the shelter prevents any harmful gases from accessing the actual shelter.
- The RESPETRA Rescue Chambers are design protected.
