

CARGO

AT THE PORT OF HELSINKI

FINLAND'S LEADING PORT OF UNITIZ

PORT OF HELSINKI

offers a vast amount of shipping connections. The offering is aided with a good balance of import and export cargo flows via its harbours. The Port of Helsinki serves cargo

traffic via four harbours (Vuosaari, Katajanokka, South and West Harbours), the prime cargo hub of them being Vuosaari. In addition, the Port of Helsinki manages cargo harbour area partly in Kantvik and owns 60% of Port of Loviisa.

WHERE DO GLOBAL SHIPPING ROUTES MEET? – in the Port of Helsinki!

VUOSAARI HARBOUR

is ideally located near all major logistic distribution centers in the greater Helsinki area, efficiently aside of the city traffic itself.

Excellent highway level hinterland connections enable a flexible and fast movement of goods.

PORT OF LOVIISA

serves as a conventional port mainly in breakbulk and bulk cargoes.

WEST HARBOUR, SOUTH HARBOUR AND KATAJANOKKA

Liner traffic offers high frequency of ro-ro cargo connections through West and South Harbour and Katajanokka to Stockholm and Tallinn.

FULL RANGE OF PORT SERVICES

A wide variety of logistics service providers are located in Vuosaari Harbour, enabling competitive rates.

These service providers offer an excellent availability of containers, trailers and other units. There are also versatile warehousing solutions and capacity for growth.

The 13 m deep Fairway (since year 2021) makes it possible for even bigger vessels to call at Vuosaari Harbour.

Newest development is the "1-Gate System", a new centralized main gate at the harbour entrance equipped with new technology, deployed in the beginning of the year 2024.

SUSTAINABLE PORT – SUSTAINABLE INVESTMENTS

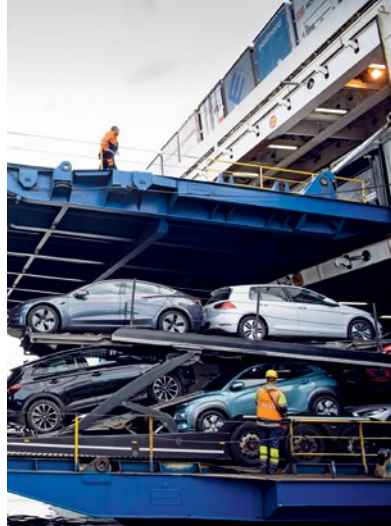

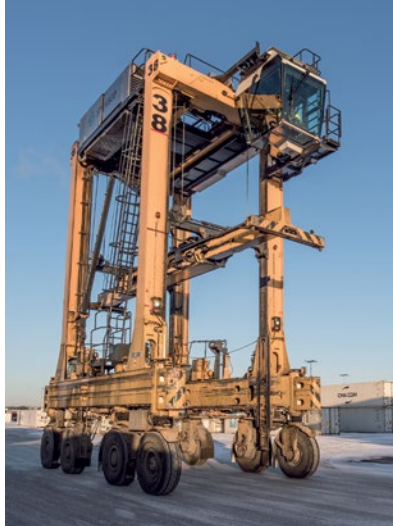

CO₂ CO₂ CO₂ CO₂ CO₂

Environmentally friendly solutions of the Port of Helsinki minimize the impact on nature. The port operations have been guided by a Certified ISO 14001 environmental management system since the year 2000.

The Port enables and encourages Environmental cooperation with e.g. these measures:

- **Onshore power supply (aim for 9 berths)**
- **Solar power in certain infrastructures and buildings**
- **Automooring quays provided (West Harbour)**
- **Management of the waste (all quays equipped with waste water collection equipment)**
- **Price Incentives introduced and environmental discounts further increased (on vessel charges)**
- **Extensive Energy efficiency investment program in port-owned buildings**
