

RESPONSIBLE
MACHINING

KONEISTAMO VERAX OY

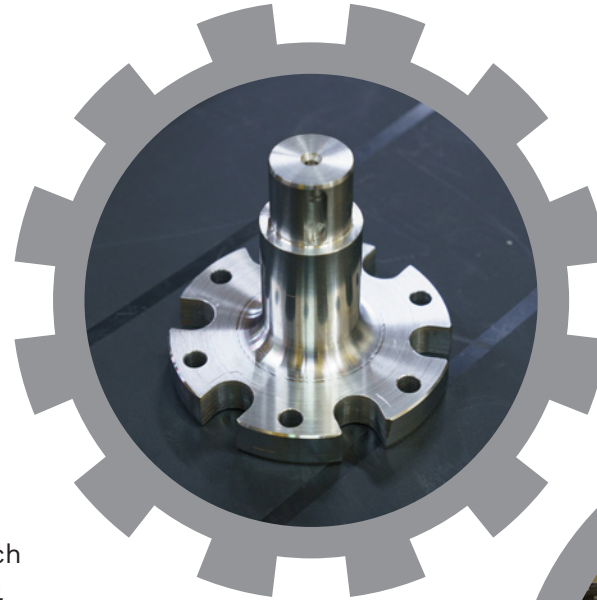

Karkkila Koneistamo Verax Oy was founded in 1988. The premises, machinery and personnel of our family business have seen steady growth over the years,*

We manufacture supplier parts for heavy and medium-heavy industries. Sizes of the series range from individual pieces to large series production according to the needs of our customers. In addition to conventional materials (iron, cast iron and stainless alloys), we manufacture products from special metals such as titanium, hastelloy and inconel. We procure some of the materials ourselves directly from European wholesalers.

The basis of our operations lies in long-term customer relationships. Some of our customers have been cooperating with us throughout the history of our company. We have

customers all over the world, and we ship products to countries such as China, the United States, Brazil and Germany. Dimensional accuracy combined with a reliable production process is the key to successful customer relationships. The size of the articles we manufacture varies from 3 mm to 1,200 mm. In order to ensure the high quality of even the most demanding parts, in addition to calibrated hand-held measuring instruments, a 3D coordinate measuring machine is available to our trained staff.

We have extensive and reliable partner networks, and we can offer our customers a wide range of services under one roof. For example, we are able to carry out coating of items from basic painting to special coatings, such as chrome plating, nitriding, as well as HVOF and Alloy 50Nb coatings.

**Koneistamo = workshop*

EXAMPLES OF OUR MACHINERY

- » multifunctional lathes
- » machining centres
- » milling machines
- » radial drills
- » manual center lathes
- » keyway milling machines
- » NC saws
- » 3D measuring machines
- » laser marking machines
- » ultrasonic washers
