

VICTOR EK

SHIPPING AND LOGISTICS SINCE 1885

WELCOME TO HANKO!

When you need a versatile logistics expert, choose Victor Ek.

Victor Ek has been operating since 1885, with roots as a family-owned company. Our main lines of business are logistics and forwarding. Over the decades, we have developed into a cost-efficient partner in which our customers place great trust.

We have a diverse customer base. Our customers include various industrial companies, such as steel wholesalers, car dealerships and other Finnish and international export and import companies. Our customers have a large flow of goods between Finland and the rest of Europe.

Our strengths include long-term relationships with different shipping and logistics companies and solid expertise in maritime transport.

Our location guarantees reliable operation regardless of the weather or situation.

Our services include:

- logistics and forwarding
- vehicle logistics
- international forwarding, container (FCL), breakbulk cargo (LCL) and air transport
- customs clearance
- storage and goods handling

New! We also offer vehicle logistics services. Read more on page 5!

In addition to logistics and forwarding, we also take care of customs clearance on your behalf. Ask for more information: logistics@victorek.fi

LOGISTICS, FORWARDING AND CUSTOMS CLEARANCE

Finland is comparable to an island in terms of location – it is necessary to cross the sea for imports and exports. The fast liner traffic of the Port of Hanko is appreciated: the majority of freight travels through the southernmost port of the country, Hanko.

Hanko offers fast daily shipping links to Continental Europe and Sweden. From Europe, Hanko offers smooth follow-up connections to the rest of Finland by road and rail. Trucks can also be loaded for the return trip, which provides savings in transport costs.

Located in the Port of Hanko, Victor Ek serves its customers with more than one hundred years of experience. The advantage of a long-term operator is seamless collaboration with shipping and stevedoring companies and international logistics operators. We communicate daily with the customs, and our ERP system is directly connected to the system of the Finnish Customs.

AGILE TERMINAL HANDLING AND STORAGE SERVICE

Location is a crucial factor in logistics, and our terminal's proximity to the Port of Hanko is one of our strengths.

Our terminal is situated right next to the Hanko port area, just 200 metres away from the deep water quay. It provides direct access to the port area, and both the terminal and the outdoor area are equipped with CCTV systems that record all activities.

We handle a variety of cargo, including steel, sheet bundles, big bags, and general goods. We also specialize in unloading MAFI and cassette loads at our terminal.

In addition to conventional terminal handling, we offer warehousing services suitable for buffer stock of construction materials, metal, and big bags. Our outdoor area is also available for storage purposes.

NEW INTERNATIONAL LOGISTICS CONCEPT FOR VEHICLES

Car trade between countries is growing – even if everything else worked well, transportation is often the main challenge. We can help you succeed!

Victor Ek's vehicle logistics service is a unique concept that has received a lot of praise from international operators. Our service facilitates transports of new and second-hand cars in a cost-efficient, reliable and predictable manner between both Finland and other Nordic countries and Continental European countries.

At the core of our service is our proprietary control system that allows us to link the customers' and partners' systems via an API. With the control system, we can manage high volumes of vehicles across Europe.

The system optimises the trip to minimise the distance driven. Longer journeys are managed cost-efficiently and ecologically through maritime transport.

We highly recommend it!
